PROFESSIONAL SUMMARY

Information Systems student at Universidad Politécnica de Madrid with strong foundations in software engineering, systems and machine learning. Seeking internships to apply technical skills, contribute to real-world projects and grow professionally.

TECHNICAL SKILLS

Languages: Java, Python, C, C++, SQL, TypeScript, JavaScript, Bash
Frameworks: Spring Boot, React, Express.js, Flask, TensorFlow
Tools: Docker, Git, Linux/Unix, MongoDB, PostgreSQL, MySQL
Concepts: OOP, Data Structures & Algorithms, Concurrency, Networking, Microservices, Machine Learning, UML, BPMN

EDUCATION

Bachelor of Science in Information Systems · Universidad Politécnica de Madrid · 2022 – Present

- Developed object-oriented programming and algorithmic problem-solving skills using Java
- Applied machine learning and data analysis techniques using Python
- Implemented operating systems concepts and low-level programming in C
- Built concurrent and parallel systems using Scala
- Explored core CS fundamentals like data structures, databases, computer architecture and networking
- Designed software using UML and modeled business processes with BPMN

42 Cursus · Fundación Telefónica (Madrid) · 2025 – Present

- Built C/C++ projects in Unix environments using Git for version control
- Applied operating systems concepts and good memory management practices
- Developed problem-solving skills through peer-to-peer methodology

EXPERIENCE & PROJECTS (MORE PROJECTS & CODE SAMPLES: [PORTFOLIO](#) · [GITHUB](#))

Unix Systems Project: Minishell & Concurrency Simulation

- Built a Unix-like shell with process management, piping and command execution
- Collaborated using Git-based workflows in a team environment

Machine Learning Project: Hand Gesture Classification (GRU + MediaPipe)

- Built a real-time hand gesture recognition system using MediaPipe
- Designed and trained GRU models with TensorFlow for sequential data
- Created and processed datasets with NumPy and OpenCV, improving model accuracy
- Developed an end-to-end ML pipeline from data collection to deployment
- Integrated the model into an interactive web-based application

Full-Stack Project: Personal Portfolio Platform

- Developed a full-stack application with a React frontend and serverless REST API backend
- Implemented data persistence using MongoDB Atlas
- Deployed a production-ready application on Netlify

ADDITIONAL CERTIFICATIONS

IBM: Python for Data Science

- Applied data manipulation and analysis using Pandas and NumPy
- Built basic data processing workflows

IBM: Building Scalable Systems & IBM: Distributed Messaging Platforms

- Analyzed distributed systems (CAP theorem, consistency models) and messaging patterns (pub/sub, saga)
- Evaluated scalability and reliability trade-offs (sharding, CRDTs)

SAP: Exploring the SAP Customer Data Platform's AI Workbench & SAP: Introducing AI Fundamentals

- Applied data integration and segmentation in enterprise contexts
- Explored AI workflows and predictive models for churn and customer value

LANGUAGES

English (B2) · Spanish (Native) · Romanian (Native)

ADDITIONAL

Driving License (B) · Available for on-site work within Madrid area
